MITHUN MOHAN

Kollam, Kerala | 8281700242 | mithunmohan1504@gmail.com | mithunmohan.in | linkedin.com/in/mithun-mohan15 | github.com/mithun15-codes

PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science student with hands-on experience in full-stack mobile and backend development. Skilled in Python, Flutter, and FastAPI with exposure to RESTful API design, database integration, and AI-based application development. Eager to contribute to real-world engineering challenges and grow within a technology-driven organization.

WORK EXPERIENCE

Python Developer Intern | Quadance Technologies Pvt. Ltd., Thiruvananthapuram / *Jun 3 – Jun 26, 2026*

- Built a Text-to-JSON data pipeline in Python using Pandas for data manipulation and openpyxl for Excel export.
- Developed an OCR pipeline using PyMuPDF and Tesseract to extract and structure text from PDF documents.
- Designed RESTful API endpoints using FastAPI with PostgreSQL and MongoDB integration; tested all APIs with Postman.
- Implemented JWT-based authentication with OAuth2 and Role-Based Access Control (RBAC) for secure backend access.
- Integrated MinIO object storage with AES-256 encryption for secure media upload and retrieval.
- Managed codebase using Git and GitHub with a consistent version-controlled workflow.

TECHNICAL SKILLS

Programming Languages: Python, Dart

Frameworks: Flutter, FastAPI

Databases: MySQL

Tools: Postman,

Version Control: Git, GitHub

PROJECTS

Road Buddy | Flutter, FastAPI — *Individual Project*

Developed a cross-platform mobile app for emergency roadside vehicle assistance. Users can request help and share live location when their vehicle breaks down. The app identifies the nearest mechanic based on vehicle type and location, with admin management for users and service requests.

Medi Track | Flutter, Firebase, IoT, ESP32 — *Group Project*

Built the mobile application for an IoT-based healthcare system to improve medication adherence. Integrated Firebase for real-time database sync, authentication, and cloud data management supporting smart medication tracking, health monitoring, and emergency alerts.

Smart Scan | Flutter, Python, Deep Learning, CNN — *Group Project*

Developed the mobile frontend for an AI-powered medical imaging analysis system. Enables users to securely upload MRI, CT, and X-ray scans, view AI-generated predictions, and access results across healthcare workflows via backend API integration.

EDUCATION

B.Tech in Computer Science and Engineering / *2023 – 2027*

St. Thomas College of Engineering & Technology, Chengannur, Alappuzha (KTU) | CGPA: 6.81

Higher Secondary School (ISC) — 76% / *2022 – 2023*

St. Mary's Residential School, Pathanapuram, Kollam

Secondary School (ICSE) — 86.2% / *2020 – 2021*

St. Mary's Residential School, Pathanapuram, Kollam

CERTIFICATIONS

NPTEL Online Certification — Programming in Python

- Completed a 12-week course covering Python fundamentals, data structures, functions, modules, file handling, and exception handling.
- Score: 86/100 (Elite + Silver equivalent)

Internship Completion Certificate — Python Developer Intern

- Issued by Quadance Technologies Pvt. Ltd., Thiruvananthapuram (June 2026)

ACHIEVEMENTS

- Completed Google Cloud Study Jams as a dedicated member of Google Developer Groups on Campus (GDGC).
- Developed and deployed the MediTrack System — an IoT-based healthcare solution using Flutter and ESP32 hardware for automated medication dispensing, biometric security, real-time heart rate tracking, and fall detection.
